Mr. Jim Quesenberry, Manager, Homologation and Certification
Webasto Product North America, Inc.
15083 North Road
Fenton, Michigan 48430

Dear Mr. Quesenberry:

By this letter, the California Air Resources Board (ARB) hereby approves the BlueCool Truck Bunk Cooler manufactured and marketed by Webasto as meeting the criteria contained in Title 13, California Code of Regulations section 2485(c)(3)(C) that allows the use of alternative technologies other than auxiliary power systems utilizing internal combustion engines or fuel-fired heaters to reduce idling emissions from heavy-duty diesel-fueled vehicles. Webasto's BlueCool Truck Bunk Cooler can be installed and operated on all heavy-duty diesel-fueled vehicles with a gross vehicle weight rating (GVWR) over 14,000 pounds, and all diesel-fueled commercial motor vehicles with a GVWR over 10,000 pounds.

As an aid for field identification and enforcement purposes, Webasto may voluntarily label the systems to be produced under this approval. The label, whether it is newly created or an existing label edited for this purpose, may make a reference to this approval by including the phrase "ARB Approval #08-643-001" or some other phrase to this effect.

Unless specific ARB approval is requested and granted, no modification that would increase emissions of criteria pollutants or toxic air contaminants can be made to the system as described in Webasto's application dated March 14, 2008, and all supplemental information provided for the approval herein.

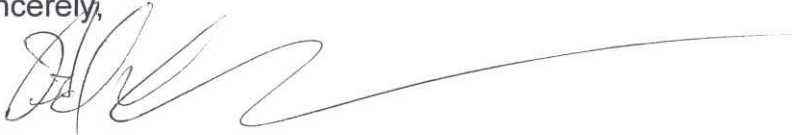

*The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption.
For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.*
