NEW SUNROOFS

Dear Webasto Authorized Installer,

Beginning October 1, 2011, the Hollandia 600 and 700 series sunroofs will change. These sunroofs have several key upgrades that will be introduced. We have included some information for you to post in your facility to help communicate the changes to your colleagues.

Some key elements to these upgrades are:

1) New names

The Hollandia 700 series sunroofs are now known as "**Hollandia 700-II Comfort**".
The Hollandia 600 series sunroofs are now known as "**Hollandia 700-II Entry**".

2) Content and Features

The Hollandia 700-II sunroofs include a new switch, sunshade, sunshade handle, motor, controller, wire harness, motor cover, motor bracket, switch bracket, gear housing, cables, and cable tubes. The new switch has a fresh, elegant design and is more simple to use. There are no longer programmable positions or a plug for the rain sensor option. All Soft Touch® features remain - single touch open and close, single touch vent, and key-off auto close (excluding auto-close from the vent position). The new switch also offers four different backlight colors - white, red, blue, and green. The new sunroofs and switches are both FMVSS 118 S5 compliant.

3) Larger opening

The Hollandia 700-II sunshade now opens an additional 20 mm, allowing for a greater see-thru opening.

4) New ordering procedure for H700-II Comfort sunroofs

Because the switches will be available in three colors (black, grey, beige), they will be ordered separately from the sunroofs. Now, when ordering the sunroofs you will order multiple part numbers - one for the sunroof and one for the appropriately colored switch and handle.
The black switch for the Hollandia 700-II Entry (H600) will come with the sunroof, so only one part number is ordered.

5) Same price

There is no change to the price.

6) Online training

Visit www.techwebasto.com for an online training course detailing the new Hollandia 700-II sunroofs.

Please review the information on the following pages. If you have any questions please contact your regional sales manager or myself.

Sincerely,

Mike Bacon
Business Development Manager

--- Changes to Hollandia 600 and 700 inbuilt sunroofs. ---

Please note that several key components have been upgraded on all Hollandia 600 and 700 sunroofs.

There are also new names and part numbers for these sunroofs.

These new sunroofs will begin to ship by October 1, 2011.

1 New Switch

The H700-II **Comfort** (H700) and the H700-II **Entry** (H600) models now offer a new switch that is designed to integrate with the original factory look of the vehicle interior.

H700-II Comfort - choice of 3 colors - grey, beige, black. Illuminated, chrome accent.

H700-II Entry - all-black color - non-illuminated.

2 New Sunshade and Handle

The H700-II **Comfort** (H700) and the H700-II **Entry** (H600) models now come with a re-designed sunshade and sunshade handle.

Sunshade Handle with chrome accent for H700-II Comfort versions is available in 3 colors - black, gray, beige.
Sunshade handle for H700-II Entry versions comes in all-black only.

4

New Motor/Controller Assembly

The H700-II now comes with the MD4 motor/controller assembly. The SCU (controller) is now integrated with the motor. The gear is also part of this assembly.

Please note that the change to MD4 motor/controller assembly means that the new electronics will not be compatible with previous version sunroofs. Service parts for previous version H700's remain available.

MD4 Motor/Controller Assembly

5

New Motor Cover

The H700-II motor cover has changed to accommodate the new motor/controller assembly. This cover "snaps" into place.

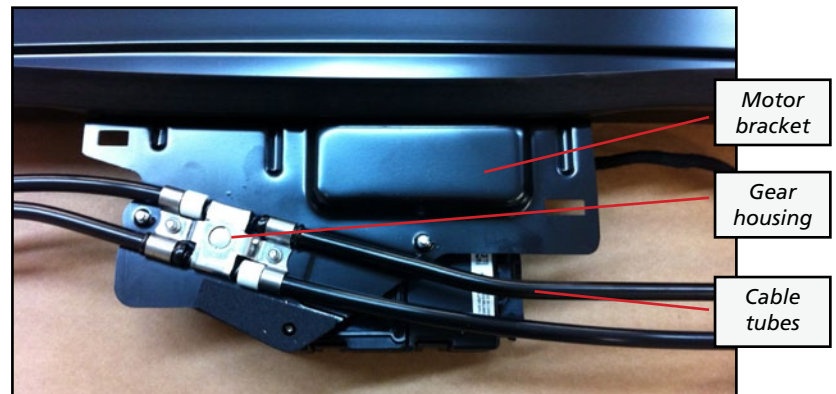

Front and rear view of motor cover

6

New Motor Bracket

The H700-II motor bracket is new, and also includes the gear housing.

7

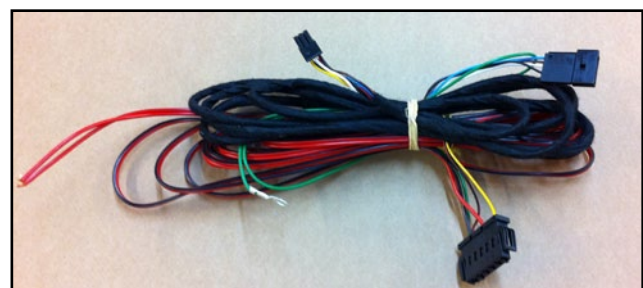

Cables and Cable Tubes

The drive cables and cable tubes are new.

8

New Wire Harness

The new wire harness includes the connector for the new motor/controller assembly.
