

December 7, 2015

Dear Webasto Authorized Installer,

Webasto has made significant improvements to all inbuilt sunroof kits.

As of December 7, 2015, all SolAire 4300/5300 and Hollandia 700 Series sunroof kits will now include additional Roof Stiffener Replacement (RSR) brackets which are required for proper installation of the sunroof. The RSR brackets **must** now be used on every vehicle that requires the removal of the B-pillar cross body in order to achieve proper installation of the sunroof in correspondence with the Webasto product installation instructions provided.

With the evolving designs of today's vehicles the use of these additional brackets, Webasto believes, will lead to an overall more universally acceptable sunroof installation.

Webasto is very aware of the changing landscape in the automotive restyling industry and stays ahead of these changes by taking the necessary steps to make sure Webasto products are the best for all partners involved.

Webasto has spent a great deal of effort and resources designing and testing these RSR systems. This represents a significant advancement in aftermarket sunroofs and once again Webasto is leading the way to ensure the continued vitality of this market segment. The Webasto series of inbuilt sunroofs is now set further ahead of all other inbuilts in the market, providing you yet another key selling feature to communicate to your customers.

Below are the changes you will notice, beginning December 7, 2015.

- Inside each SolAire sunroof box will be a set of four RSR brackets
- Inside each Hollandia 700 Series sunroof box will be a set of two RSR brackets

Moving forward, for proper sunroof installation, these RSR brackets **must** be used on every vehicle.

To upgrade existing inventory that you may have on hand, please contact Webasto by email at [mike.bacon@webasto.com](mailto:mike.bacon@webasto.com), to obtain corresponding RSR kits at no cost.

Please refer to the Webasto Dynamic Application Guide at [www.techwebasto.com](http://www.techwebasto.com) for vehicle specific application information updates. Webasto will begin loading these application updates (i.e. 2015 model years) beginning December 7, 2015.

Please find new updated part numbers below, pricing for the inbuilt sunroofs with this additional content now included in every kit, **will not increase**.

Sunroof Kit	New Part #
Hollandia 710-II Comfort w/ RSR	3396793A
Hollandia 730-II Comfort w/ RSR	3396794A
Hollandia 730-II Entry w/ RSR	3396798A
Hollandia 735-II Comfort w/ RSR	3396795A
Hollandia 735-II Entry w/ RSR	3396799A
Hollandia 740-II Comfort w/ RSR	3396796A
Hollandia 740-II Entry w/ RSR	3396800A
Hollandia 790-II Comfort w/ RSR	3396797A
SolAire 4300 w/ RSR	1597-W-0100A-D
